EDUCATION QUALIFICATION

Master of Science (Computer Application) **2023 – 2025**
Aligarh Muslim University, India
CGPA: 9.0

Bachelor of Science (Computer Application) **2020 – 2023**
Aligarh Muslim University, India
CGPA: 8.5

TECHNICAL SKILLS

- Python, Java
- React, React Native
- Node.js, Express.js
- Prompt Engineering
- Retrieval-Augmented Generation (RAG)

PUBLICATIONS

Retrieval-Augmented Generation for Large Language Models: Evolution, Architectures, Applications, and Challenges (2020–2025) https://doi.org/10.1002/widm.70122
Wiley — WIREs Data Mining and Knowledge Discovery · Aug 5, 2026

PRISMA-guided review synthesizing 91 studies (2020–2025) on Retrieval-Augmented Generation (RAG) for large language models. Analyzes the evolution of RAG architectures — sparse, dense, hybrid, GraphRAG, multimodal, multilingual, retrieval-aware pre-training, and agentic workflows — and evaluates retrieval strategies, reranking, context construction, faithfulness, attribution, robustness, security, and governance across healthcare, legal, enterprise, and educational applications. Highlights open research challenges and reproducibility through RAG Cards.

AI-Driven Knowledge Retrieval for Medical Question-Answering Using Large Language Models and Retrieval-Augmented Generation https://doi.org/10.1109/IMPACT68503.2026.11468290
IEEE — IMPACT2026 · Feb 14, 2026

Comparative evaluation of baseline models, LLM prompting techniques, and multiple RAG variants on the MedMCQA dataset. Answer-Expansion RAG achieved the highest accuracy, with a statistically significant improvement over traditional and prompt-only approaches.

PROJECTS

1. EduSync — Multi-role Academic Platform with AI-powered Assignment Generation & Lab Workflow Automation
Developed EduSync for the Department of Computer Science, AMU — a comprehensive education management system with four user roles: Admin, Lab In-charge, Instructor, and Student, currently in use within the department. Implemented secure role-based authentication and backend access control with dark mode and activity logging. Integrated LLM APIs to generate unique weekly questions, test cases, and mixed-concept challenges. Incorporated a Compiler API for real-time code execution and evaluation. Built interactive dashboards for labs, sessions, student groups, and performance analytics, enabling real-time progress tracking, submission review with feedback, and leaderboards.

Tech: React.js, Node.js, Express.js, MongoDB, TailwindCSS, LLM integration

2. Talk2Doc — Mobile Doctor Consultation App
Developed a mobile consultation app for a single doctor's practice enabling patients to register, pay, and securely consult via chat supporting text, images, and files. Designed full consultation lifecycle management, feedback system, and report generation.

Tech: React Native (Expo), NativeWind, Node.js, Express, PostgreSQL

EXPERIENCE

Ad hoc Computer Science Teacher **July 2025 – Present**
Qadira Girls' School, Al-Barkaat Public School, Aligarh

Teach Python programming to students of Classes XI and XII and Information Technology fundamentals to students of Classes IX and X, delivering engaging lessons and fostering practical computing skills.

Instructor **Nov 2025 – June 2026**
Dept. of Computer Science, Aligarh Muslim University, Aligarh

Assisted Bachelor of Computer Applications (BSc.CA) and Master of Computer Applications (MCA) students in laboratory sessions, monitored academic progress, evaluated weekly assignments, and provided technical guidance.

Backend Developer Intern **Sept 2024 – Dec 2024**
Zidio Development (Remote)

Completed a web development internship focusing on backend architecture and API integration. Contributed to building secure and optimized REST APIs using Node.js and Express.

CERTIFICATES

- Machine Learning A-Z: AI, Python
- AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents

ACHIEVEMENTS

- 3rd Rank in Master of Science (Computer Application), Aligarh Muslim University
- UGC NET Qualified, 2026
